Creative Thinker

I'm a designer driven by curiosity, creativity, and a love for building experiences that make people's lives easier. With a degree in Interaction Design and experience across UX, UI, and visual design, I thrive on solving problems with simplicity and creativity.

Outside the screen, I'm an enthusiast for craftsmanship, from sketching to 3D printing sculptures and experimenting with product design. For me, design is not just work, **it's how I see and interact with the world.**
